Corona Pandemic Got You Worried?

Corona is all that the entire world is talking about and rightfully so. We understand that the pandemic has got everyone panicked so let's try to understand a little bit about this virus and how it could affect us and our kids.

Should you pull kids out of school? Is it goodbye to summer vacation?

The COVID-19 has created a lot of panic amongst people and if there's one thing parents know, it is that we will do whatever required to keep our kids safe.

But this is where corona tests everyone's patience. The best thing you can do to keep your child safe is **NOTHING**. That's right - nothing.

Experts suggest that social distancing is the best thing you can do for you, your child, and everyone else.

So, what is social distancing?
Social distancing simply refers to avoiding close contact with other individuals in order to avoid catching the virus yourself and to avoid passing it on.

So, what can we do?
There are a number of things that you can follow to keep kids as safe as possible.

- Clean hands often using soap and water or alcohol-based hand sanitizer
- Avoid people who are sick (coughing and sneezing)
- Clean and disinfect high-touch surfaces daily in household common areas (e.g. tables, hard-backed chairs, doorknobs, light switches, remotes, handles, desks, toilets, sinks)

- Launder items including washable plush toys as appropriate in accordance with the manufacturer's instructions.
